Berlin based Violinist and Vocal Artist Simon Jakob Drees

Mirkaledo-Vocal-Improvisation - A Path to Music.

My Breathing - A silent song, the connection between Inside and Outside. My Song a sounding Breath.

Voice and Breathing are interwoven to sound. Singing is a spiritual process, taking possession of the body, breaking out of the bodies boundaries and becomes audible through the body.

Workshop for experimental work with Vocals through musically integrating Breathing and Voice into each other.

The aspects to be considered:

- body consciousness to establish the "Sound Vessel"
- emotions as a Intensity Continuum
- making contact to explore phenomenons of resonance in us and around us.

All 3 aspects are pointing to the moment which becomes the base and fundament for musical improvisation.

The workshop is open for everyone who is interested in improvising with his voice and provides a space for musical group interaction.
